Overview of Vase Construction

Vase Construction is a recognized leader in connecting buyers of construction projects and providers of construction services. The value proposition offered to buyers of construction projects is the cost to acquire vetted suppliers using VaseConstruction.com, which is at least 50% less than conventional means (ads in newspapers, time and labor cost to check credentials). Providers of construction services can find work for a fraction of the cost of hiring a salesperson or other outreach activities. Vase Construction is a VASE Management LLC Company.
